TABLE OF CONTENTS

EXECUTIVE SUMMARY	34
PURPOSE AND SCOPE	34
THE 2025 EDITION	34
ACKNOWLEDGEMENTS.....	36
A YEAR IN REVIEW	49
KEY DEVELOPMENTS.....	52
THE GLOBAL AI POLICY LANDSCAPE.....	53
COUNCIL OF EUROPE	53
<i>European Court of Human Rights</i>	54
EUROPEAN UNION	55
<i>European Commission</i>	55
<i>European Parliament</i>	56
<i>Two Councils</i>	57
<i>Court of Justice of the European Union</i>	57
<i>European Data Protection Board</i>	58
<i>European Data Protection Supervisor</i>	59
G7	60
<i>G7 Privacy Roundtable</i>	61
G20	62
GLOBAL PRIVACY ASSEMBLY	62
OECD.....	63
<i>Global Partnership on AI</i>	63
<i>OECD AI Policy Observatory</i>	64
<i>Collaboration with United Nations</i>	64
UNITED NATIONS	65
UNESCO.....	65
<i>UN High Commissioner for Human Rights</i>	67
<i>UN Special Rapporteur</i>	68
<i>UN and Lethal Autonomous Weapons</i>	69
THE VATICAN.....	72
TECHNICAL SOCIETIES	73
LEGAL SOCIETIES.....	74
CIVIL SOCIETY.....	75
<i>Global Efforts</i>	75
<i>Africa</i>	75
<i>Americas</i>	76
<i>Asia</i>	77
<i>Europe</i>	78
COUNTRY REPORTS.....	79
ARGENTINA.....	79
<i>National AI Strategy</i>	79
<i>Local Strategies</i>	80

Artificial Intelligence and Democratic Values 2025

Center for AI and Digital Policy

<i>Public Participation</i>	81
<i>Data Protection</i>	81
<i>Algorithmic Transparency</i>	84
<i>Data Scraping</i>	86
<i>Use of AI in Public Administration</i>	87
<i>Facial Recognition</i>	88
<i>Environmental Impact of AI</i>	90
<i>Lethal Autonomous Weapons</i>	91
<i>Human Rights</i>	92
<i>OECD / G20 AI Principles</i>	93
<i>Council of Europe Convention on AI</i>	94
<i>UNESCO Recommendation on AI Ethics</i>	94
<i>Evaluation</i>	95
AUSTRALIA	95
<i>National AI Strategy</i>	96
<i>International Cooperation on Safe and Responsible AI</i>	99
<i>Public Participation</i>	100
<i>Data Protection</i>	102
<i>Algorithmic Transparency</i>	104
<i>Data Scraping</i>	106
<i>Use of AI in Public Administration</i>	107
<i>Use of AI in Education</i>	111
<i>Use of AI in the Military</i>	112
<i>Lethal Autonomous Weapons</i>	113
<i>Environmental Impacts of AI</i>	115
<i>Human Rights</i>	117
<i>OECD / G20 AI Principles</i>	118
<i>Council of Europe AI Treaty</i>	119

Artificial Intelligence and Democratic Values 2025

Center for AI and Digital Policy

EXECUTIVE SUMMARY

Purpose and Scope

Artificial Intelligence and Democratic Values is the first global survey to assess progress toward trustworthy AI, based on detailed narrative reports, combined with a methodology that produces ratings and rankings for national AI policies and practices.

The **AIDV Index** has these objectives: (1) to document AI policies and practices, based on publicly available sources, (2) to establish a methodology for the evaluation of AI policies and practices, based on global norms, (3) to provide a basis for comparative evaluation, (4) to provide the basis for future evaluations, and (5) to ultimately encourage all countries to make real the promise of AI that is trustworthy, human-centric, and provides broad social benefit to all.

Artificial Intelligence and Democratic Values focuses on human rights, rule of law, and democratic governance metrics. Endorsement and implementation of the OECD/G20 AI Principles and the UNESCO Recommendation on the Ethics of Artificial Intelligence are among the primary metrics. Opportunities for the public to participate in the formation of national AI policy, adoption of the right to algorithmic transparency, and creation of independent agencies to address AI challenges are also among the metrics. Patents, publications, investment, and employment impacts are important metrics for the AI economy, but they are not considered here.

Artificial Intelligence and Democratic Values is published annually and will evolve as country practices change and new issues emerge.

The 2025 Edition

The 2025 edition of the report updates and expands the previous reports. To reflect some of the key discussions and developments in the AI policy landscape, our efforts to enhance usability, and our expansion as an organization, we have also made the following changes for *Artificial Intelligence and Democratic Values 2025*.

- We highlighted key actions taken in 2024 at the start of each country report.
- We changed the metric concerning signing the UNESCO Recommendation on the Ethics of AI to signing the Council of Europe international AI Treaty. We added a section on the Council of Europe AI Treaty to all country reports.
- We introduced a section on the Environmental Impact of AI to weigh policies on the resource demands of AI systems and efforts to mitigate environmental impacts more broadly.

Artificial Intelligence and Democratic Values 2025

Center for AI and Digital Policy

- The scores for country reports previously published were reviewed and revised based on developments during the past year concerning AI policies and practices.
- The number of researchers participating in the project has grown significantly. Nearly 500 CAIDP Research Group members representing more than 90 countries contributed updates from 2024. This brings our total contributors well above 1000 researchers representing 120 countries.

Endorsements

As the development and use of AI continues to increase exponentially, governments and civil society have struggled to keep pace. However, in recent years there has been unprecedented growth in law and policy. This report is essential reading for anyone looking to grasp the key trends that link how nation states are responding to the rise of AI, and for anyone looking to understand the key developments in specific states. It is both thoroughly researched and the product of deep and broad expertise.

– *Edward Santow, Human Technology Institute, UTS (2025)*

The AIDV Index is an incredibly impressive and valuable compendium. The country reports themselves offer an extremely valuable collection of case studies.

– *Justin Longo, University of Regina (2025)*

The AI and Democratic Values 2024 report is a well-developed and highly technical work that provides essential insights into the intersection of artificial

Artificial Intelligence and Democratic Values 2025

Center for AI and Digital Policy

intelligence and democratic governance. This report serves as a crucial tool for understanding how nations can effectively promote and safeguard democratic values in the age of AI. It is an invaluable resource for countries seeking to strengthen democratic principles while leveraging AI responsibly.

– *Armando Guio Español, Affiliate, Berkman Klein Center (2025)*

It is always encouraging to see the progress in AIDV and its contribution to the formation of AI policies around the world.

– *Wonki Min, KAIST (2025)*

The report seeks to shed light on the broad landscape of AI regulation and governance. Accordingly, it seeks to explicate both the challenges and opportunities surrounding the adoption of AI systems, making the AIDV a useful reference document that points towards more inclusive digital futures.

– *Bulelani Jili, Harvard University (2025)*

I endorse this report for its clear and diverse inclusion of countries in both the Global North and the Global South. The report gives an important insight into AI-related activities globally. This is important because AI does not operate in a vacuum, nor does it operate in silos: its impact is intertwined across the globe.

– *Kutoma Wakunuma, De Montfort University (2025)*

The CAIDP 2024 Report continues its tradition of excellence in providing essential insights into the global relationship among democratic values, ethics and the accelerated pace of AI innovation and development. It is an essential tool to understand the nature of AI and its relationship to the public good. At UNESCO, with our global standard on the ethics of AI, we are proud to partner with CAIDP to achieve a technological transition that is fair and sustainable.

– *Gabriela Ramos, UNESCO (2024)*

CAIDP (AIDV 2023) report sheds light on the current landscape of international regulations, national laws and policies emerging from the fascinating and complex field of AI. The report emphasizes the imperative to protect fundamental rights and uphold the rule of law and will serve as a useful roadmap for shaping AI governance and to foster and advance a crucial dialogue among diverse stakeholders in the international arena.”

– *Cristos Velasco, DHBW Cooperative State University (2024)*

CAIDP's flagship report provides insightful information how the AI principles are translated into practice across 75 countries.

– *Wonki Min, SUNY Korea (2023)*

Artificial Intelligence and Democratic Values 2025

Center for AI and Digital Policy

It is a great exercise of comparative digital law in action, providing a comprehensive perspective on the evolution of AI policy also contributing to underline the constitutional relationship between AI & democracy. Digital Democracy and rule of law in the digital context will be the real challenges for the next decade.

– *Oreste Pollicino, Bocconi University (2023)*

A very worthwhile analysis.

– *Stuart Russell, University of Berkeley, California (2022)*

An impressive body of work.

– *Alessandro Acquisti, Carnegie Mellon University (2022)*

An excellent report, a very useful tool for the community and a reference to see nexus between AI and Democratic Values.

– *Leyla Keser, Istanbul Bilgi University (2022)*

A very insightful report on AI laws and policies that addresses significant international developments and provides a terrific comparison of AI laws and policies across 50 countries.

– *Lee J. Tiedrich, Duke University (2022)*

This report is unique in that it compares AI policies and practices around the world and should inspire progress toward trustworthy and human-centric AI. The report also documents the important role of digital rights and consumer groups in this endeavor.

– *Ursula Pahl, European Consumer Association (BEUC) (2022)*

It's rare to read a document that has the potential to influence national policies on artificial intelligence around the world. The country descriptions and evaluations are thoughtfully organized, well-written, and carefully documented. The country rankings enable readers to have a broad understanding of who the leaders are and why, while pointing out what still needs to be done. The AI and Democratic Values index gives me hope that AI policy efforts can improve human rights, social justice, and dignity.

– *Ben Shneiderman, author, Human-Centric AI (Oxford 2022)*

In this historical moment of global interest, negotiation, and competition on AI we are in right now, we urgently need a shared narrative serving the human interest and democracy. With its comprehensive overview of key global and local power actors and initiatives The Artificial Intelligence and Democratic Values Index is

Artificial Intelligence and Democratic Values 2025

Center for AI and Digital Policy

an essential instrument for the facilitation of this shared global dialogue on AI now and in many years to come.

- Gry Hasselbalch, *DataEthics.eu*, *InTouchAI.eu* (2022)

This is a very ambitious and important exercise. The outcome is impressive—detailed and rigorous.

- Valsamis Mitsilegas, *Queen Mary University of London* (2022)

This comparative study sheds critical light on the adoption of Artificial Intelligence in democratic societies. AI and Democratic Values is an indispensable reference source for regulators, reporters, academics, and practitioners

- Dr. Pablo G. Molina, *Georgetown University* and founder, *International Applied Ethics and Technology Association* (*iaeta.org*) (2022)

Artificial Intelligence and Democratic Values 2025

Center for AI and Digital Policy

A Year in Review

2024: Principles to Action

The *AI and Democratic Values Index* published annually by the Center for AI and Digital Policy provides a comprehensive review of AI policies and practices worldwide. In this fifth edition, we highlight the rapid evolution of AI governance frameworks. From the completion of a global AI treaty and a comprehensive regulation for AI, through resolutions and recommendations from the United Nations, and the development of regional frameworks and national laws and enforcement actions, the pace of AI governance, much like the technology itself, is accelerating.

This year, the first legally binding global treaty on artificial intelligence and human rights opened for signature. Expert reports followed by discussions and negotiations among member and non-member states at the Council of Europe over several years culminated in the Framework Convention on Artificial Intelligence and Human Rights, Democracy, and the Rule of Law. Over forty countries from Europe, the Americas, Middle East-North Africa, and Asia have signed, signaling a global commitment to protecting human rights, democracy, and the rule of law.

Activities at the United Nations also demonstrate widespread support for managing emerging technologies and the digital world in line with human rights and, more specifically the Sustainable Development Goals (SDGs). The UN resolution supported by more than 120 countries in March 2024 demonstrated far-reaching support for ensuring that AI systems and applications are safe, secure, and trustworthy. The Global Digital Compact reiterated this commitment to ensuring that digital spaces conform to the same standards of international law and human rights protections we expect offline. The Pact for the Future lays out actions to ensure everyone enjoys these rights and to transform global governance to ensure all voices are heard.

Countries from the Global South led the world in implementing the UNESCO Recommendation on the Ethics of AI. Facilitated through partnerships with UNESCO, countries in Latin America, the Caribbean, Asia, and Africa have explicitly modeled AI policies and strategies on the Recommendation and completed the Readiness Assessment Methodology (RAM). The Latin American and Caribbean Regional Council developed through partnership with UNESCO and CAF provides opportunities to exchange best practices and develop a regional process for implementation. Brazil, Chile, the Dominican Republic, Mexico, and Uruguay from Latin America; Indonesia from Asia; Morocco and Saudi Arabia from MENA; and Gabon, Kenya, Mozambique, Senegal, and South Africa of Africa completed the RAM in 2024. More than thirty additional countries are in the process of completing the RAM.

Calls to transform global governance also translated into action in 2024. Brazil's presidency of the G20 led to an action plan to close the digital divide,

Artificial Intelligence and Democratic Values 2025

Center for AI and Digital Policy

reiterated calls for inclusive AI, and launched the Social 20 event to give civil society a place to be heard during the summit. The Digital Economy Working Group solidified goals for inclusive sustainable development in the Toolkit for AI Readiness and Capacity Assessment. The African Union's G20 membership and the South Africa presidency in 2025 can solidify this progress.

The Global Partnership on Artificial Intelligence (GPAI) joined forces with the OECD in July 2024. The integrated partnership creates another avenue for experts and policymakers from developing and emerging economies to contribute to discussions on AI policy and practice aligned with the OECD AI Principles.

The G7, too, translated principles and goals in the Hiroshima process to tools in 2024. The G7 Technology and Digital ministers launched the G7 Toolkit for AI in the Public, providing guidance to ensure AI in the public sector is safe, secure, and trustworthy. The section on AI, Science, Technology, and Innovation in the leaders' communiqué promised an action plan on AI in work. The communiqué identified partnerships as central to realizing an inclusive, human-centered, digital transformation. For example, collaboration with the OECD led to the launch of a monitoring tool for organizations developing advanced AI systems aligned to the Hiroshima Process International Code of Conduct.

At the regional level, the EU AI Act, a comprehensive regulation for the governance of AI, was formally adopted in March 2024 by the European Parliament, with a large majority of votes (523-46) in favor of the legislation. The risk-based framework notably includes a category of prohibited AI systems, such as subliminal manipulation, social scoring, scraping of facial images for facial recognition, biometric categorization, and real-time biometric identification. At the time of publication, nearly 200 national supervisory authorities have been selected to ensure the enforcement and implementation of the AI Act, with data protection agencies given a prominent role. The first provisions entered into force in August 2024.

Years of negotiations culminated in 2024 in the African Union's endorsement of the Continental AI Strategy. The strategy offers a test case for a "people-centered, development-oriented" approach to harnessing the transformative potential of AI developments and mitigating the negative impacts and risks. The strategy provides concrete action steps to ensure that AI development is African-centric by addressing systemic limitations in human and technological capacity. The Association of Southeast Asian Nations (ASEAN) demonstrated the adaptability of governance frameworks and benefits of public-private partnership by targeting the ASEAN Guide on AI Governance and Ethics to organizations across private and public sectors. The framework exemplifies meaningful, human-centric development by ensuring AI systems are developed to solve specific problems, within explicit governance and accountability structures,

Artificial Intelligence and Democratic Values 2025

Center for AI and Digital Policy

with human involvement and stakeholder community, and through operations management to identify and monitor risks and biases.

In the 2023 ***AI and Democratic Values Index***, we called attention to the use of autonomous weapons in regional conflicts, most prominently in Ukraine and Gaza. This year brought progress toward an international instrument on lethal autonomous weapons systems (LAWS). The UN Secretary-General report on LAWS in mid-2024 summarized various perspectives on and challenges in formulating one. However, the Secretary-General reiterated calls to develop the tool by 2026. At the REAIM 2024 summit in Korea, 63 countries agreed to concrete actions toward developing common normative frameworks for responsible AI in the military domain. A 2024 U.S. National Security Memorandum, for example, reiterated instructions to the U.S. military, the largest in the world, to use AI systems only in ways that align with democratic values and limited the use of AI systems in warfare.

In addition to updating and implementing national AI strategies, countries have also progressed on holding AI companies accountable. Brazil's judiciary banned and then fined X over its failure to handle accounts spreading misinformation about elections while the data protection authority prohibited Meta from using data originating in Brazil to train AI models. More than nine countries and the EU are investigating OpenAI over privacy and data protection violations and misinformation. Italy and Belgium are looking into DeepSeek. Meanwhile, Clearview paid new fines and was the subject of new investigations over databases of facial images collected and stored illegally.

We credit these milestones to the hard work and spirit of collaboration of the AI advisors, decisionmakers, heads of government, independent experts, civil society organizers, and individual advocates. Your work has built momentum that gives us confidence as we continue our mission to develop *a better society, more fair, more just—a world where technology promotes broad social inclusion based on fundamental rights, democratic institutions, and the rule of law*.

Of course, none of our work is possible without our extraordinary CAIDP team. Hundreds of Research Group members provided additions and updates to the report for 2024, guided by Team Leaders and Teaching Fellows. This year, we also benefitted from the editorial contributions of Policy Group members as well as reviews from our Global Academic Network. From the early project by a few people turned over in months, the current report reflects the efforts of more than 1000 contributors representing 120 countries over years of work.

We welcome your advice, suggestions, revisions, and insights about how you use the AIDV Index in your work. Please send editorial comments to editor@caidp.org and visit our website, www.caidp.org, for more information about our activities, recent AI policy developments, and how to get involved.

Artificial Intelligence and Democratic Values 2025

Center for AI and Digital Policy

Key Developments

- Forty-one countries endorsed the Council of Europe Framework Convention on Artificial Intelligence and Human Rights, Democracy, and the Rule of Law
- The UN Resolution on Safe, Secure, and Trustworthy AI, along with the Global Digital Compact reflected widespread consensus on the importance of protecting fundamental rights and freedoms in digital interactions
- The Global Partnership on AI created an integrated partnership with OECD to broaden efforts to implement the OECD AI Principles
- The EU completed the AI Act, the first comprehensive regulation on AI; the first provisions entered into force
- The African Union endorsed the Continental AI Strategy
- G20, G7, ASEAN, OECD, and the AI Seoul Summit created tools to facilitate compliance with guiding principles and codes of conduct for organizations designing, developing, deploying, and using AI technology
- Twelve countries completed and more than 30 initiated the Readiness Assessment Methodology (RAM), signaling progress on implementing the UNESCO Recommendation on the Ethics of AI
- The UN Secretary-General reiterated the call for prohibitions on fully autonomous weapons and regulations on other forms of autonomous weapons systems

CAIDP Recommendations for 2025

- Global support for the International AI Treaty
- Prohibitions on AI systems that undermine human rights and democratic values
- Human oversight of AI systems across the lifecycle
- Implementation and enforcement of AI governance frameworks, such as the EU AI Act and the Hiroshima AI Process
- Algorithmic transparency, including the accountability to contest adverse outcomes
- Liability rules for AI systems
