Introduction

Introductory statement by Amy Hogan-Burney and Igor Tsyganskiy	04
About this report	05
Our unique vantage point	06
Top 10 recommendations from this report	07

Part I. The threat landscape

Key takeaways	09
How threat actors are shaping the cyber risk environment	10
A ransomware attack with potential global impact stopped in under two minutes	12
Logging in: The new playbook for initial access	13
Emerging threats: What's next from attackers	14
Identity, access, and the cybercrime economy	16
From end users to workloads: The new horizon in identity threats	17
User impersonation tactics	17
Strategic threats to the research and academia sector	18
Access brokers: The hidden gatekeepers of cybercrime	19
Password spray: Anatomy of a high-volume attack	21
Human-operated attacks and ransomware	24
Human-operated intrusions	24
Ransomware's shifting tactics	27

Data exfiltration and impact: Are you prepared?	29
A study in time: What happens when you hesitate?	30
Fraud and social engineering	32
The rise of deepfakes and synthetic identities: How AI is fueling identity fraud at scale	33
Virtual credit cards and the shifting fraud landscape	34
Domain impersonation in the age of AI: Defending against scale and speed	35
Social engineering exploits	36
The rise of ClickFix	36
Phishing landscape	37
Email bombing as a precursor to social engineering attacks	37
BEC: A high-impact threat driven by identity compromise	38
Device code phishing: The next generation of credential theft	40
Cloud threat trends	41
Cloud under fire: Escalating attacks in cloud environments	41
Container security in focus	42
Nation-state adversary threats	43
Regional sample of nation-state activity levels observed	44
China: Global espionage at scale	45
Iran: Persistent and adaptive	46

Russia: Expanding its target set but still focused on Ukraine	47
North Korea: Revenue generation and remote workers	48
Nation-state abuse of AI in influence operations: Emerging tactics and strategic implications	49
Insider risk in the age of strategic geopolitical competition	50
AI's double-edged influence: Defending and disrupting the digital landscape	52
Traditional cybersecurity	52
Adversarial exploitation of inherent risks	54
Dangerous capabilities	55
Operational issues	55
Emerging threats	55
Storm-2139: How Microsoft disrupted an AI exploitation and abuse ring	56
Quantum technologies: Strategic priority in a new era of competition	57

Part II. The defense landscape

Key takeaways: Insights and actions for cyber defense	59
AI and advanced defense	60
AI-powered defense	60
Securing identity in the age of AI	61
Cloud-scale AI defense	62

Securing AI systems	63
AI vs. cybercrime	63
Countering nation-state and emerging threats	64
Disrupting cybercrime ecosystems	64
Deterrence in action	66
Addressing the geopolitical enablers of ransomware operations	67
Combating cyber mercenaries	67
Intelligent signals	68
Collaboration as a counter measure	69
Policy, capacity, and future readiness	70
Securing the digital frontier	70
Resilience by design	72
Building resilience in critical infrastructure	73
Microsoft's strategic path to quantum safety	74
Strategic vision and global commitments	76
Secure Future Initiative: progress and priorities	76
Microsoft's commitment to strengthening global cybersecurity	77
Closing	78
